Kinsman et. al

Serial No.: 10/648,654

Filed: August 26, 2003

For: METHODS FOR STRESS
REDUCTION FEATURE FOR LOC LEAD
FRAME

Confirmation No.: 3870

Examiner: J. Fischer

Group Art Unit: 1733

Attorney Docket No.: 2269-2739.6US
(95-1011.05/US)

NOTICE OF EXPRESS MAILING

Express Mail Mailing Label Number: EV 827472853 US

Date of Deposit with USPS: June 26, 2006

Person making Deposit: Wendy Neff

COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Mail Stop ISSUE FEE
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

The Examiner indicates:

[In regards to claims 1-11, the prior art references of record failed to suggest, disclose, or teach a single assembly method for a semiconductor die and a lead frame having each of the claimed steps, including the formation of a stress relief portion in a plurality of lead members, wherein said portion has an amount of flexure and is formed by one of machining, etching, deforming, or electron beam technique.

As to claims 12-26, the prior art references of record failed to suggest, disclose, or teach the specific assembly of the claimed invention, including a semiconductor

die, at least one adhesive agent, material having a filler material therein, and a lead frame having the above noted stress relief portion.]

Applicants concur with the reasons as stated by the Examiner insofar as they comprise a summary, and are exemplary and not limiting. However, the independent claims as allowed include other and different language than that specified by the Examiner, and the allowed dependent claims include other and further features and elements. Accordingly, the scope of the claims must be determined from the literal language of each as a whole, as well as equivalents thereof.

Respectfully submitted,
